

## **Best of Bamboo II:**

Best of Bamboo II expands on Gladson's celebrated bamboo suiting and jacketing program, showcasing the fiber's signature softness, graceful drape, and understated sheen. This new edition introduces fresh patterns and designs in 100% bamboo, alongside blends that pair bamboo with wool or silk to enhance resilience, texture, and depth. The result is a collection that feels luxurious to the touch yet remains light and comfortable for daily wear. Jackets and suits made from these fabrics present a refined impression with unique visual character—ideal for clients who appreciate garments that stand apart subtly rather than loudly. Tailors will find the cloth easy to shape and press, with a natural fluidity that complements both structured and soft tailoring styles. Best of Bamboo II reaffirms the material's status as a modern alternative to traditional tropical wool, offering elevated style with a relaxed, contemporary sensibility.
